MF TACTICAL®

THE PLACE FOR FLASHLIGHT FREAKS

COB HEADLAMP User Guide

Features:

Specifications:

Size: 31 x 3.2 x 4cm (LxWxH); Weight: 99g

Output & Runtime:

	White High	White Low	Yellow High	Yellow Low	Red High
	185 LUMENS	90 LUMENS	185 LUMENS	90 LUMENS	185 LUMENS
	3h	4h	3h	4h	3h
	Red Strobe	LED High	LED Low	W+Y High	W+Y Strobe
	185 LUMENS	70 LUMENS	30 LUMENS	370 LUMENS	370 LUMENS
	4h	3h	5h	1.5h	3h

Charging:

- To charge, plug USB-C end of cable into COB Headlamp and USB-A end into power source. After 20 secs, red light will indicate battery is charging. When red light turns green (approx. 4 hrs.), your COB Headlamp is fully charged and ready to go.

Operation:

- Click the ON/OFF switch to turn on. Once on, click ON/OFF again to change modes. Modes will cycle in this order: COB cool white high, COB cool white low, COB warm white high, COB warm white low, COB red high, COB red strobe, side LED high, side LED low, then off.
- For instant on in the brightest mode from off or any mode, click and hold the ON/OFF switch for 2 secs, which will activate both the cool white and warm white COBs on high. Once in full on, a single click of the ON/OFF button turns to cool white/warm white strobe. One more single click will turn the headlamp off.
- When the light is on, a single click of the sensor switch enters sensor mode: a wave of your hand in front of the sensor light to turn on and off; click again the sensor switch to turn off sensor mode function.
- Power indicator will be green when battery is 20% charged or higher and red when battery is below 20% charge.

Thank you for purchasing a quality MF TACTICAL product! v.1.2
